EDUCATION

Tennessee State University (ABET Accredited) Nashville, TN
Master of Science in Computer Science, Cybersecurity and Networking **GPA: 3.77** Expected May 2028

Tennessee State University (ABET Accredited) Nashville, TN
Bachelor of Science in Computer Science **GPA: 3.69** Graduated

CERTIFICATIONS AND TECHNICAL SKILLS

Certification: CompTIA Security+ (SY0-701)
Application Security: Threat modeling (STRIDE), security design review, OWASP Top 10, SQL injection and XSS testing, secure code development, SAST (CodeQL), SCA (Dependabot, OWASP Dependency-Check), vulnerability assessment and triage
Access Control and Identity: Spring Security, RBAC, least privilege, separation of duties, method-level authorization, row-level security (RLS), IAM, BCrypt, account lockout, audit logging
Compliance and Frameworks: NIST SP 800-53 (control mapping), NIST CSF, MITRE ATT&CK, risk management
Detection and Response: Threat detection, security monitoring, alert triage, incident investigation, Windows security events, PCAP analysis, Wireshark, root cause analysis
Languages: Python, Java, PHP, JavaScript, SQL, Bash, PowerShell
Systems and Tools: Linux, Windows, Git/GitHub, TCP/IP, HTTP, TLS, DNS, VLANs, Cisco IOS, Spring Boot, SQLite, PostgreSQL, Jira, Confluence, Agile (Scrum)
Automation and Testing: pytest, JUnit 5, pandas, Scapy, Streamlit, Claude, Cursor

CYBERSECURITY PROJECTS AND RESEARCH

Secure Employee Management System (SEMS) Personal Cybersecurity Project
Tech Stack: Java 25, Spring Boot, Spring Security, SQLite, Maven, JUnit 5 Nov. 2026 – Present

- Mapped 13 STRIDE threats to NIST SP 800-53 controls in a design review, documenting residual gaps and risk rationale.
- Built least privilege for 3 roles (@PreAuthorize, separation of duties), AC-7 lockout, salted BCrypt, CSRF protection, and enumeration-safe login errors.
- Ran CodeQL (SAST), Dependabot (SCA), and OWASP Dependency-Check via GitHub; fixed a High-severity ReDoS and cut dependency CVEs from 61 to 34.
- Verified SQL injection and stored XSS resistance across login, leave requests, and the audit log using code review, manual payloads, and 3 automated tests.
- Wrote 44 JUnit 5 tests (auth, RBAC, lockout, audit logging, injection/XSS); reviewed Claude/Cursor-generated tests against the threat model.

NetWatch – Network Traffic & System Event Monitoring Personal Cybersecurity Project
Technologies: Python, Scapy, SQLite, pandas, Streamlit Oct. 2026 – Present

- Built a Streamlit dashboard correlating up to 100,000 PCAP packets with Windows events from 4 log channels for alert triage.
- Mapped 3 tunable detection rules to MITRE ATT&CK (T1110.001, T1046), producing evidence-linked alerts with status tracking.
- Validated with 58 pytest tests on seeded data; documented detection gaps in a STRIDE threat model.

Software Supply Chain Security Research | Faculty-Supervised Project Tennessee State University
Focus: Third-Party Risk, SBOMs, AI Model Security Sept. 2026 – Present

- Presented 4 briefs on Log4Shell, event-stream, xz, runtime SBOMs, malicious AI models, and DEMATEL risk prioritization.
- Analyzed MEM-SBOM (*Computers & Security*): 10 version mismatches across 51 Python apps; 83.3% fewer false positives in one case study.

WORK EXPERIENCE

BECO Holdings Incorporated – Remote Nashville, TN
Software Engineer Intern Jul. 2026 – Present

- Executed 20+ security test cases on Stripe payment flows and row-level security (access control, duplicate transactions, refunds); documented results as evidence.
- Built and maintained full-stack PHP applications for 3 government, healthcare, and education clients.

The Blount Group LLC – Remote Memphis, TN
Technology Systems and Automation Intern Jan. 2026 – Jul. 2026

- Tested an AI voice booking agent; found and reported a time-zone bug that booked clients at the wrong hour.
- Built a full-stack PHP website for a health and life insurance agency.

American Honda Motor Company, Incorporated Torrance, CA
Mobile Web and Product Development Co-op Jun. 2025 – Aug. 2025

- Identified and escalated delivery risks on a ROAM board during PI Planning for an Agile (Scrum) team, supporting risk-based planning.
- Documented user stories in Confluence, tracked work in Jira, and validated the mobile app against Figma designs with QA.

Music City Center Nashville, TN
Network Technician I Jul. 2024 – May 2025

- Configured and troubleshot 50 Cisco switches plus routers across 3 VLANs, supporting 50+ events.
- Resolved 20+ network tickets and outages weekly through root cause analysis of TCP/IP, port, and protocol faults.
