EDUCATION

Tennessee State University (ABET Accredited) Nashville, TN
Master of Science in Computer Science, Cybersecurity and Networking **GPA: 3.77** Expected May 2028

Tennessee State University (ABET Accredited) Nashville, TN
Bachelor of Science in Computer Science, **GPA: 3.69** Graduated

CERTIFICATIONS AND TECHNICAL SKILLS

Certification: CompTIA Security+ (SY0-701)
Security Assessment & Compliance: NIST SP 800-53 (control mapping), NIST Cybersecurity Framework, Risk Management, Security Controls, Vulnerability Assessment, Configuration Auditing, Security Documentation, Secure SDLC Testing, MITRE ATT&CK
Access Control & Audit: IAM, RBAC, Least Privilege, Separation of Duties, Row-Level Security (RLS), Method-Level Authorization, BCrypt**,** Audit Logging
Detection & Analysis: Security Monitoring, Threat Detection, Incident Investigation, Alert Triage, Windows Security Events, PCAP Analysis, Wireshark, Root Cause Analysis
Networking & Systems: TCP/IP, VLANs, Cisco IOS, SecureCRT, Linux, Windows
Programming & Automation: Python, Java, SQL, PowerShell, Bash, JavaScript, PHP, pandas, Scapy, pytest, JUnit 5
Tools & Process: Spring Boot, Spring Security, SQLite, PostgreSQL, Git/GitHub, Jira, Confluence, Agile (Scrum)

CYBERSECURITY PROJECTS AND RESEARCH

NetWatch – Network Traffic & System Event Monitoring Personal Cybersecurity Project
Technologies: Python, Scapy, SQLite, pandas, Streamlit Oct. 2026 – Present

- Developed a 5-page Streamlit analyst dashboard correlating PCAP/PCAPNG traffic (up to 100,000 packets) with Windows security events from 4 log channels, producing evidence-linked alerts for investigation and audit review.
- Engineered 3 tunable detection rules (5 failed logons in 300 s, 15 ports in 60 s, 3x traffic spikes) mapped to MITRE ATT&CK T1110.001 and T1046 to flag deviations from normal network and system behavior mitigation.
- Validated detections against 800 packets, 80 events, 8 failed logons, and a Wireshark capture.

Secure Employee Management System (SEMS) Personal Cybersecurity Project
Tech Stack: Java 21, Spring Boot, Spring Security, SQLite, Maven, JUnit 5 Oct. 2026 - Present

- Enforced a least-privilege access policy for 3 roles (Admin, Manager, Employee) using method-level @PreAuthorize, salted BCrypt hashing, and generic login errors to block account enumeration (aligned to NIST 800-53 AC and IA controls).
- Enforced separation-of-duties policy in the leave workflow (no self-approval, no re-deciding) and logged authentication, access-denial, and data-change events with no passwords or session IDs (aligned to AU controls).
- Wrote 25 JUnit 5 tests (0 failures) verifying authentication, RBAC, workflow rules, and audit logging.

Software Supply Chain Security Research Tennessee State University
Focus: Vulnerability Analysis, Threat Detection, AI Security Risks Sept. 2026 - Present

- Analyzed Log4Shell (CVE-2021-44228, CVSS 10.0) and SolarWinds (2020), comparing a widely embedded library flaw against a build-pipeline compromise to assess third-party dependency and software integrity risk.
- Evaluated AI-related security risks across interconnected systems and presented methodology, findings, and risk implications in written summaries and presentations.

WORK EXPERIENCE

BECO Holdings Incorporated - Remote Nashville, TN
Software Engineer Intern Jul. 2026 – Present

- Executed 20+ security-focused test cases on Stripe payment processing and database Row-Level Security (RLS) policies, covering unauthorized access prevention, duplicate transactions, refunds, and transaction integrity.
- Verified access controls and secure payment workflows through end-to-end integration testing across mobile apps, Stripe, and backend databases.
- Develop and maintain full-stack PHP web applications for 3 clients in government, healthcare, and education.

The Blount Group LLC. - Remote Memphis, TN
Technology Systems and Automation Intern Jan. 2026 – Jul. 2026

- Integrated and tested AI-driven automation workflows and agents, validating functionality and identifying gains in reliability, efficiency, and scalability.
- Built a full-stack PHP website via cPanel for a health and life insurance agency, delivering frontend and backend functionality.

American Honda Motor Company, Incorporated. Torrance, CA
Mobile Web and Product Development Co-op Jun. 2025 – Aug. 2025

- Documented user stories in Confluence, tracked work in Jira, and raised delivery risks on a ROAM board during PI Planning in an Agile (Scrum) team.
- Validated the mobile app against Figma designs with the QA team to confirm it met requirements.

Music City Center Nashville, TN
Network Technician I Jul. 2024 – May 2025

- Configured, maintained, and troubleshot 50 enterprise Cisco switches plus routers across 3 VLANs, supporting 50+ events.
- Resolved 20+ network tickets and outages per week by diagnosing TCP/IP, port, and protocol faults through root cause analysis.
